EDUCATION

VIT BHOPAL UNIVERSITY

Bhopal, Madhya Pradesh, India

Bachelor of Technology

Expected June, 2026

- Computer Science and Engineering with Specialization in Gaming Technology
- CGPA : 8.36/10

TECHNICAL SKILLS

- **Languages and Frameworks-** C#, Python, Java, Apex (Salesforce), SQL
- **Database:** MySQL
- **Game Engines-** Unity (6.0), Unreal Engine 5

WORK EXPERIENCE

KARMA PLAY ACADEMY

September, 2025

Game Programmer Intern

- Project 'Aquaworld': Leading technical implementation for an underwater crafting-survival title using Unity 6.0, focusing on core gameplay loops and performance.
- Inventory Architecture: Engineered a robust hotbar system integrated with hand-held item logic to enhance player interaction and inventory management efficiency.
- Animation Systems: Designed and implemented C# State Machine behaviors to manage character animations, ensuring fluid transitions and responsive movement.
- Collaboration: Actively collaborated with technical leads to debug physics-based interactions and optimize scene memory usage.

CLOVETRIX TECHNOLOGIES (Internship)

March, 2025 - April, 2025

- Started with the basics of Salesforce such as getting familiar with the interface, learning in depth about the apex language.
- Worked on a project to make modification in the visualforce page of a client as per the requirements. Some of the modifications are adding some new fields in the page, rearranging the page layout, etc.

PROJECTS

AR Tennis Game (University Project)

- Computer Vision: Implemented real-time object tracking using OpenCV to translate physical object movements into virtual input.
- Physics Simulation: Optimized ball physics using C# to simulate realistic trajectory, bounce friction, and collision forces.

Village Runner (Personal Project)

- It is a chasing game made using Unreal Engine 5. It consists of a player being chased by the villagers for collecting gold coins. It also counts the coins being collected by the player during the chase.
- I have designed the game using blueprints and made a score counter UI which updates on collecting coins

CybHacks- Cyber Security Game (Capstone Project)

Tech Stack: Unity, C#

- Gamified Learning: Developed an interactive educational experience teaching cybersecurity fundamentals through immersive game levels.
- System Integration: Programmed a modular quest and hint system that adapts difficulty based on player progress.

ADDITIONAL

- **Languages:** English, Tamil, Hindi
- **Soft Skills:** Fast learner, Teamplayer, Communication
