SUMMARY

Passionate and detail-oriented software developer with a strong foundation in programming, problem-solving, and software development principles. Proficient in [list key languages, e.g., Python, Java, JavaScript], with experience in developing and debugging applications. Enthusiastic about learning new technologies and contributing to innovative projects. Strong teamwork and communication skills, with a commitment to writing clean, efficient, and maintainable code.

EDUCATION

VIT BHOPAL UNIVERSITY

Bhopal, Madhya Pradesh, India

Bachelor of Technology

Expected June, 2026

- Computer Science and Engineering with Specialization in Gaming Technology
- CGPA : 8.32/10
- Related Coursework: Unreal Engine, Unity, HTML5

EDUSTAR INTERNATIONAL SCHOOL (Class XII)

Kovilpatti, Tamil Nadu, India

Central Board of Secondary Education

2022

- Percentage: 85%
- Subject : Computer Science, Physics, Maths, Chemistry

EDUSTAR INTERNATIONAL SCHOOL (Class X)

Kovilpatti, Tamil Nadu, India

Central Board of Secondary Education

2022

- Percentage: 73.2%

ADDITIONAL

- **Technical Skills:** Python, Java, C++, C#, HTML5, Javascript, Unreal Engine, Unity Engine
- **Languages:** English, Tamil, Hindi

WORK EXPERIENCE

CLOVETRIX TECHNOLOGIES (Internship)

1 March, 2025 - 31 April, 2025

- Started with the basics of **Salesforce** such as getting familiar with the interface, learning in depth about the apex language.
- Worked on a project to make modification in the **visualforce page** of a client as per the requirements. Some of the modifications are adding some new fields in the page, rearranging the page layout, etc.

UNIFIED MENTOR (Data Scientist Intern)

15 April, 2025 - 15 July, 2025

- I have learnt in depth about **python programming** (such as pandas, numpy, matplotlib, etc). I am working on four projects in which the given data should be processed and provide the output in a graphical format (such as to **find the attrition rate of employees** from the given data).

PROJECTS

Unified Mentor Projects (Internship Project)

- It is one of the project in internship, a python project in which the data is retrieved from a dataset and attrition rate is calculated
- It also graphically represents other information (such as education of employees in different categories, how many male and female employees, etc.)
- Libraries Used: Pandas, Numpy, Matplot, Seaborn.
- Other Unified Mentor projects can be found on GitHub.
